

OVs and AHVLA

Working in Partnership

TB online submissions

What is it?

- AHVLA, formerly known as Animal Health, has developed a core IT system known as Sam
- Sam holds information on all our customers, electronically stores customer documents and enables us to manage work on system
- As part of our Reform Programme we are developing the Sam system to manage TB
- Part of this capability will enable us to share elements of Sam with you
- OV's will be able to access elements of Sam from July 2011
- Sam will replace the current VeBus system for TB Testing

Why are you introducing these changes?

- By capturing TB information in Sam we will:
 - **improve speed and quality** - by reducing the time required to enter test results and to remove infected animals, thereby improving disease control
 - **improve efficiency** - by reducing manual and duplicate data entry

How does this affect the work I do for AHVLA?

- It will not affect existing field instructions or training
- It will only affect the way you receive and submit bTB testing results
- Sam will enable you to:
 - record planned visits
 - record and submit results for bTB testing that are completed both on behalf of AHVLA and privately

How will it work?

- You will be able to access Sam via the current Government Gateway
- Once logged into Sam you will be able to view work lists and enter test results
- TB tests can then be submitted in one of three ways:
 - by entering test data directly into Sam
 - by entering test data onto an off-line form and uploading into Sam
 - by uploading test data from another IT application
- There will be no requirement to submit paper forms to AHVLA

Your current process

- Test instructions received via post from BT4 / Work list or VeBus
- TT1 carried out – animals injected and measurements recorded (on paper form, third party application or remote device)
- TT2 carried out (72 hours after TT1) – any reactions measured and recorded (on paper form, third party application or remote device)
- Results added to TB52 (test chart) – either by upload from third party application or remote device, entered online via VeBus or entered manually
- TB52 printed
- OV signs TB52
- TB52 posted to local AHVLA office within five working days of TT2 date or 24 hours where reactors have been disclosed

New process with on-line submissions

- Test instructions received through the Sam portal
- Test chart pre-populated with customer details, OV adds test arranged date once known
- OV / OV Admin will be able to populate test chart from CTS with animal IDs if needed
- Test chart printed or loaded into third party application or remote device
- OV / OV Admin enters results – either:
 - entered offline and uploaded into Sam
 - entered directly into Sam from a paper copy
 - uploaded from third party application or remote device
- OV electronically ‘signs off’ test in Sam by submitting the results to Sam
- Sam validates data entered

How will I access Sam?

- You will need:
 - a PC and broadband connection
- MS Excel 2007
- Anti-Virus software
- Access to Sam via a link from the OV section of the AHVLA website and the Government Gateway
- You will need to be registered with the Government Gateway

What are the benefits?

- Improved access to work lists
- Improved off-line working capability
- Reduced time to input test results
- AHVLA will now notify the 'test arranged' date to paying agencies through Sam
- Improved speed of results submission to AHVLA
- Reduced use and handling of paper and reduced postage costs

What will Sam look like for you?

I certify that I have subjected the animals noted to the Intradermal Comparative Tuberculin Test, and the result of each test as indicated on the relevant chart(s). I further certify that whilst performing the test, I clinically inspected the animals noted (including a physical examination of reactors, inconclusive reactors, emaciated cattle etc.) and in my opinion no animal showed clinical signs of Tuberculosis, or any other notifiable disease of cattle with the exception of the animal(s) specified.

Sign Activity Test Results

This is where you will submit the test results to AHVLA

How will I be supported?

- AHVLA is currently developing a detailed plan to support you which will include:
 - guidance on registering and using Sam
 - e-learning training material hosted via the National School of Government website
 - access to an IT helpdesk
 - more intensive support provided during the initial implementation period

What is the timeline for these changes?

Registration - next steps

- Registration packs have been sent to OV practices who currently conduct TB tests on our behalf
- Registrations received throughout April and May will result in confirmation letters being issued to proposed Sam users in June
- Users can then complete their registration with the Government Gateway. Guidance will be issued which will explain the process
- It will not be possible for us to progress registrations received in June and beyond until **after** the Sam system update takes place in July

More information about the changes & contact details:

Over the next few months we will keep you up to date through:

- AHVLA website
- OV Newsletter
- via email
