Guidance Notes: Submitting samples to APHA for Rabies Serology

The APHA Rabies Laboratory is an OIE Reference Laboratory and an EU-approved laboratory for rabies serology. Rabies testing at APHA is accredited to ISO/IEC 17025 (UKAS accreditation number 1769).

Please note incomplete submission forms will result in a delay to testing.

Completing the VLARAB1 submission form

- The form can be found at <http://ahvla.defra.gov.uk/vet-gateway/surveillance/forms.htm>
- This form should only be used for rabies post vaccination serology in animals.
- It should not be used if there is a suspicion of clinical rabies. In the UK, any suspicion of rabies must be reported to your local APHA Office.
- Use one submission form per animal.
- The test result will not be valid for the Pet Travel Scheme unless the submission form is completed in full and signed by the submitting veterinary surgeon.
- Test reports are sent only to the submitting practice unless otherwise indicated on the submission form. Duplicate reports may subsequently be provided but only with the written consent of the submitting veterinary surgeon.
- The animal's microchip number must be read before the blood is taken
- Please indicate your choice of test. Two tests are available at APHA. The submitting veterinary surgeon is responsible for the choice of test, and should ensure that the reported results comply with the Pet Travel Scheme requirements applicable in the relevant destination country:
 - TC0570 is a full titration test – the result would be reported as an end point rabies antibody titre in IU/ml.
 - TC0712 is a reduced dilution test and is reported as PASS or FAIL only. The report states that a pass represents a rabies antibody titre ≥ 0.5 IU/ml.
- The maximum test turnaround times are 14 working days (TC0712) and 20 working days (TC0570).
- Please indicate your preferred method of payment by either inserting your debit or credit card details or requesting an invoice.

Submitting the samples to APHA

- A minimum of 1ml serum (preferable) or 2ml clotted blood should be sent in a plain tube, marked with the owner's name, animal's name and microchip number.
- Please send the sample(s) with completed submission form(s) in an insulated leak-proof container (IATA packing instructions 650) and label the package with the following:
 1. Canine/feline serum samples - no commercial value
 2. Category 3 Veterinary diagnostic specimens - not restricted.

Additional Requirements for samples submitted from non-EU countries

- Submissions must be accompanied by an import licence (Appendix 1) and labelled as follows:
 1. Canine/feline serum samples - no commercial value
 2. Category 3 Veterinary diagnostic specimens - not restricted.
 3. Packaged in accordance with IATA Packing Instructions 650
 4. Import Licence ITIMP17.0008
 5. Country of origin (your country)

APHA is an Executive Agency of the Department for Environment, Food and Rural Affairs and also works on behalf of the Scottish Government, Welsh Government and Food Standards Agency to safeguard animal and plant health for the benefit of people, the environment and the economy.

Animal & Plant Health Agency

- Please indicate a maximum value of the goods of \$1. Failure to do so may result in additional importation charges. APHA will not accept any additional charges - these must be paid by the customer.
- A cover letter on headed note paper must also be enclosed, signed by the submitting veterinary surgeon and describing the contents of the package (i.e. number of submitted serum samples per species). The letter must also include a 'Freedom from Disease Declaration' stating the following:
 - i) The serum is not derived from an animal known or suspected to be infected with a pathogen which causes a notifiable disease to which the animal from which the serum is derived is susceptible according to European Regulations* or the Animal Health Regulations of the exporting country; and
 - ii) That the serum does not originate from an animal in a premise or region or zone of a country that is subject to official restrictions due to a notifiable disease to which the animals are susceptible according to European or other National Animal Health Regulations.

*Council Directive 82/894/EEC of 21 December 1982 (as amended) on the notification of animal diseases within the Community

Send your completed submission form and sample to:

Rabies Serology/Sample Reception
Animal and Plant Health Agency
Woodham Lane,
New Haw Addlestone
Surrey, KT15 3NB,
United Kingdom

Additional Information

- Visit Defra's website at <http://www.defra.gov.uk> for further information on the Pet Travel Scheme.
- Contact the dedicated APHA PETS Helpline if you have any queries relating to the tests
Tel: ++44(0)1932 357335 Fax: ++44(0)1932 359519 Email: lab.services@APHA.gsi.gov.uk
- For current test prices and additional charges please visit <https://www.gov.uk/guidance/laboratory-test-price-lists>
- APHA may use samples and test data for training, research and surveillance purposes but without compromising client confidentiality.

FAIR PROCESSING NOTICE

Defra, the Scottish Government, the Welsh Government and the Food Standards Agency are Data Controllers in Common in respect of personal data processed by the Animal and Plant Health Agency (APHA). For the purposes and usage of the data by APHA and the data sharing arrangements, please see the APHA Personal Information Charter on GOV.UK. A hard copy of this can be provided if required; please contact your local APHA Field Service office. APHA will not permit any unwarranted breach of confidentiality or act in contravention of their obligations under the Data Protection Act 1998. APHA is an Executive Agency of the Department for Environment, Food and Rural Affairs and also works on behalf of the Scottish Government, Welsh Government and Food Standards Agency.
